The screenshot displays two windows from the LAN Speed Test application. The 'Advanced Configuration' window on the left has the 'General' tab selected. It includes a warning about testing time, a 'Test Type' dropdown set to 'Successive', and several sliders for 'Test Packet Size (1 MB)', 'Number of Test Packets (10)', 'Continuous Mode (Off)', and 'Wait time between tests (10)'. There are also checkboxes for 'Binary Display Mode', 'Bypass drive's write caching', 'Delete test file from server', 'Print help section', 'Check for update online at startup', and 'Debug Window'. The 'LAN Speed Test' window on the right shows test parameters: Computer Name (DESKTOP-TUGTHM7), IP Address (127.0.0.1), MAC Address (00-00-00-00-00-00), Packet Size (1,000,000), Packets (10), and Folder or Server IP (C:\Users\MASTERkreatif\Desktop). Below these are performance metrics for 'Writing (Upload)' and 'Reading (Download)', including Time / Packet, Time to complete, Bytes per second, and Bits per second. The 'Mbps (Default)' is shown as 223.9878080 for writing and 1,092.19192 for reading. The 'Throughput' is set to 'Average', and the 'Status' is 'Finished' with a date of 2016-06-21 05:40:32. Buttons for 'View Log File', 'Clear Results', 'Exit', and 'Start Test' are visible at the bottom.
